

HD 250s

The HD 250S is a speaker that was carefully designed to work with wide response, (full range) and high definition, adapting to the most varied types sound systems, reproducing firm bass, clean mids and crystal clear highs, with low distortions due to its topology. Electro-acoustic construction, it has a high frequency cellulose whizzer cone, working along with an aluminum dust cap. It also features a foam edge providing better linearity in its response range. Live a new experience listening to your playlist with a fidelity that will amaze your ears, and potencialize your musical experience.
